METAL PROGRESS

THE MAGAZINE OF MATERIALS AND PROCESS ENGINEERING

Volume 91

January 1967 through June 1967

Subject Index

Abrasives
Measuring the Performance of Coated Abrasives, by Francis J. Quinn 2-81
A Test for Blast Cleaning and Peening Media, by David A. Hale 4-78

Adhesive bonding
Applying Carbide Coatings by Adhesive Bonding, by William E. Fawcett 5-91

Aging
Duplex Aging . . . the Way to Strong, Corrosion Resistant Aluminum Alloys, by Wayne C. Rotsell and James R. Long 5-106

Aircraft
Molded Aircraft Wheels of Reinforced Plastics, by Norman L. Gamble 4-115
Plastics in the Boeing 737, by John P. Billington 2-96

Aluminum
Stainless Wire + Aluminum Matrix = Strong, Light Composite Plate, by LeRoy W. Davis 4-105

Aluminum alloys
Duplex Aging . . . the Way to Strong, Corrosion Resistant Aluminum Alloys, by Wayne C. Rotsell and James R. Long 5-106
Extending the Possible in Metalworking, by Ralph G. Dermott 4-65
Producing High Quality Resistance Welds in Aluminum and Magnesium, by Lyle Wallis 4-72

Anodizing
New Coatings for Zinc, by Albert R. Cook 3-111

Aperture masks
Making Aperture Masks for Color Television Tubes, by Leon J. Dennis 3-71

Appliances
Selecting Materials for Small Appliances . . . How Sunbeam Does It, by Richard W. Hanzel 5-58

Automobiles
Ways to Improve Quality of Copper and Brass Auto Radiators, by Neale E. Orrok *(d)* 5-140

Bearings
Fight Against Wear Starts With Material Selection, Staff Report 5-69
Guide to Selection of Materials for Bushings and Thrust Bearings, by L. J. Pesek *(ds)* 3-92A

Beryllium alloys
Beryllium Wire: A New Engineering Material, by Norman P. Pinto and John P. Denny 6-107
Diffusion Bonding Beryllium, Molybdenum and Tungsten, by Anthony T. D'Annessa 2-71
Making Satellite Structures from Beryllium-Lockalloy, by John A. Van Hamersveld, Thomas S. Svendsen and Walter C. Hayes 2-91
Polishing Beryllium by Vibration, by Arthur L. Danforth and David Krashes 2-115

Bismuth
Bismuth's Unusual Properties Meet Many Special Needs, by Richard D. Becker 6-61

Blasting
A Test for Blast Cleaning and Peening Media, by David A. Hale 4-78

Boilers
Materials for Boilers and Nuclear Reactor Vessels, by Roy E. Lorentz Jr. and Walter L. Harding *(ds)* 4-94A
Selection of Materials for Boilers and Nuclear Reactors, by Roy E. Lorentz Jr. and Walter L. Harding 4-95

Boron carbides
Where Nonmetallic Composites Are Used, by George Epstein, V. Frank Hribar and Harold Smallen 3-105

Brass
Ways to Improve Quality of Copper and Brass Auto Radiators, by Neale E. Orrok *(d)* 5-140

Brazing
Furnace Brazing Inconel 718 for Nuclear Reactors, by Leopoldo Marti-Balaguer and Marshall E. Rinker 5-113
Refractory Metals Brazed for Operation at 2200 F, by Renato M. Baciarelli 4-189
Two Ways to Join Wire Spacers to Reactor Fuel Tubes, by Stuart R. Vandenberg 6-67

Carbon steels
Chromized Steel . . . Corrosion Resistance at Less Cost Than Stainless Steel, by Richard M. Willison and Julius v. D. Forstmann 1-99
Chromized Steel . . . Welds Are Strong and Corrosion Resistant, by George F. Melloy and Enos H. Brubaker 1-104

Carburizing
51 Companies Report Gas Carburizing Practices, by Nicholas P. Milano 6-54

Casting
Extending the Possible in Metalworking, by Ralph G. Dermott 4-65
General Motors Builds "Foundry of Tomorrow" 2-131
Polishing Beryllium by Vibration, by Arthur L. Danforth and David Krashes 2-117
Pressure Casting Step by Step 2-137

Chemical processing equipment
Titanium in Process Equipment, by Fred H. Vorhis 2-105

Chromized steels
Chromized Steel . . . Corrosion Resistance at Less Cost Than Stainless Steel, by Richard M. Willison and Julius v. D. Forstmann 1-99
Chromized Steel . . . Welds Are Strong and Corrosion Resistant, by George F. Melloy and Enos H. Brubaker 1-104

Coatings
New Coatings for Zinc, by Albert R. Cook 3-111
A New Look at Coating Metal Parts With Polymer Powders, by Lester L. Spiller 1-146
What You Should Know About Testing Electroplated Coatings, by Albert C. Benning 4-125

Cobalt alloys
Gear Material for Operation at 1000 F, by Stanley Wallerstein 5-89
Where You Can Use Today's Superalloys, by Ward F. Simmons and Herbert J. Wagner 6-87

Composites
Stainless Wire + Aluminum Matrix = Strong, Light Composite Plate, by LeRoy W. Davis 4-105

Compression tests
True Strain Rate Compression Testing in a Cam Plastometer, by John E. Hockett 6-64

Consumable electrode melting
Electroflux Remelting Improves Properties of Inconel 718, by Leonard G. Joseph and G. Robert Mumau 6-139

Continuous casting
Iron Powders Formulated for High Strength, Compressibility *(tn)* 3-7
Operating a Continuous Casting Machine, Staff Report 5-115

Controlled atmospheres
Atmospheres for Modern Heat Treating . . . Assuring Safety in Use, by Frederick C. Schaefer 3-67
. . . Controlling Their Composition, by Hugh F. Coyle 3-64
. . . Using Them in Production, by Norbert K. Koebel 3-61

Conversion coatings
New Coatings for Zinc, by Albert R. Cook 3-111

Copper alloys
A Modern Mill for Copper Tubing, Staff Report 1-113
Stranded Copper Wires Joined by Resistance Welding *(tn)* 2-7
Ways to Improve Quality of Copper and Brass Auto Radiators, by Neale E. Orrok *(d)* 5-140

Cryogenics
Mechanical Properties and Strength to Density Ratio of Metals for Cryogenic Service, by Fred R. Schwartzberg and S. H. Osgood *(ds)* 2-90B

Design Engineering Show
Special Preview . . . Design Engineering Show 5-43

Die castings
Electrical, Electronic Components Connected by Die Casting, by Rob H. Cushman 6-76
Preparation Can Lower Cost of Plating Zinc Die Castings, by William H. Safranek 5-95

Dies
Using Inserts in Sheet Forming Dies, by Paul G. Nelson 1-83

Diffusion bonding
Diffusion Bonding Beryllium, Molybdenum and Tungsten, by Anthony T. D'Annessa 2-71

Editorials
Design to Heat Treat Cheaper, Better, by Allen G. Gray *(cp)* 3-59
Fashioning the Future, by Allen G. Gray *(cp)* 2-57
Focus on Materials Engineering . . . to Improve Profits, by Allen G. Gray *(cp)* 1-81
It's Time for a New Attack on Wear, by Allen G. Gray *(cp)* 5-57
Let's Get Back on the Right Track, by Allen G. Gray *(cp)* 6-53

(cp) **Critical Point;** *(d)* **Digest;** *(ds)* **Data Sheet;** *(sr)* **Short Runs;** *(tn)* **Technical News**

Specifications Can't Stand Still, by Allen G. Gray *(cp)* 4-59

Electrical devices
Electrical, Electronic Components Connected by Die Casting, by Rob H. Cushman 6-76

Electrochemical machining
ECM at General Motors, MP Interview Report 3-81

Electrodeposition
Electrodeposited Paint Protects Sharp Edges, by Joseph E. Foster..... 2-87

Electron fractography
Electron Fractography Pinpoints Cause of Fatigue Fracture, by Edward A. Lauchner and Robert E. Herfert..... 2-79

Electroplating
Designer's Guide: How Electroplating Affects Dimensions of Fasteners..... 5-94
Metallurgical Aspects of Electrodeposits, by Ralph G. Dermott *(d)* 4-158
New Coatings for Zinc, by Albert R. Cook.....3-111
What You Should Know About Testing Electroplated Coatings, by Albert C. Benning 4-125

Extruding
Extending the Possible in Metalworking, by Ralph G. Dermott..... 4-66

Failures
Materials . . . Design . . . Fabrication . . . Testing . . . An Analysis of Failures in Spacecraft, by Alfred J. Babecki, John D. Grimsley and Henry E. Frankel 2-100
You Can Avoid the High Cost of Heavy Machinery Failures, by Richard Gaydos.. 6-80

Fasteners
Designers' Guide to the Selection of Fastener Materials *(ds)* 1-98C

Fatigue tests
For High Fatigue Strength, Select a Strong Steel, by Frank E. Havens and James P. Bruner.....6-123

Finishing
Neutralizing Liquid Wastes in Metal Finishing, by Leslie E. Lancy.....4-82

Forging
A Decade of Improvements in Generator Rotor Forgings, by Herman D. Greenberg 3-93
Extending the Possible in Metalworking, by Ralph G. Dermott..... 4-61
Factors in Selecting Materials for Forming, by Robert H. Heyer and John R. Newby 3-85
Lockheed: 'Cost Savings Could Pay for the 200,000 Ton Forging Press' *(tn)* 2-7
Using Inserts in Sheet Forming Dies, by Paul G. Nelson 1-83

Foundry practice
General Motors Builds "Foundry of Tomorrow" 2-131

Fractures
Electron Fractography Pinpoints Cause of Fatigue Fracture, by Edward A. Lauchner and Robert E. Herfert..... 2-79

Gears
Gear Material for Operation at 1000 F, by Stanley Wallerstein..... 5-89
Tractor Gears . . . Steel and Heat Treatment Selection, by Neale E. Orrok.....1-126

Generators
A Decade of Improvements in Generator Rotor Forgings, by Herman D. Greenberg 3-93
Problems With Turbine and Generator Materials, by David L. Newhouse..... 3-98

Hardness tests
Four Decades of Progress in Hardness Testing, by Vincent E. Lysaght..... 4-89

Heat resistant alloys
Gear Material for Operation at 1000 F., by Stanley Wallerstein..... 5-89
Where Soviet Superalloys Stand, by Herbert J. Wagner and Joseph Prock Jr. 3-75
Where You Can Use Today's Superalloys, by Ward F. Simmons and Herbert J. Wagner..... 6-87

Heat treatment
51 Companies Report Gas Carburizing Practices, by Nicholas P. Milano..... 6-54
Atmospheres for Modern Heat Treating . . . Assuring Safety in Use, by Frederick C. Schaefer..... 3-67
. . . Controlling Their Composition, by Hugh F. Coyle..... 3-64
. . . Using Them in Production, by Norbert K. Koebel..... 3-61
Heat Treating Titanium and Its Alloys, by John A. Burger and Dean K. Hanink 6-70
How Grain Size Affects Life of Heat Treating Baskets, by J. Barry Hartland 4-75
Optimizing Heat Treatments for Precipitation Hardening Superalloys, by Richard R. MacFarlane and C. Raymond Whitney 2-75

Hopkins Process
Electroflux Remelting Improves Properties of Inconel 718, by Leonard G. Joseph and G. Robert Mumau.....6-139

Hydrogen embrittlement
Relieving Hydrogen Embrittlement in Fully Hardened Electroplated Steel, by George E. Wood and William L. Mitchell 3-79

Inserts
Using Inserts in Sheet Forming Dies, by Paul G. Nelson..... 1-83

Investment castings
Selecting Alloys for Investment Cast Parts, by Leon Bouvier.....5-121

Iron-nickel alloys
Where You Can Use Today's Superalloys, by Ward F. Simmons and Herbert J. Wagner 6-87

Iron powders
McLouth Invests $105 Million in Continuous Casting of Rimmed Steel *(tn)* .. 3-7

Lasers
The Laser in Machining and Welding, by Neale E. Orrok *(d)* 2-150

Lunar craft
LM — Next Step in the Conquest of Space, by Neale E. Orrok 2-58
Spacecraft Plumbing Systems, by Lawrence J. Korb, Lewis W. Myers and Joseph Soja 2-65

Machining
ECM at General Motors, MP Interview Report 3-81
The Laser in Machining and Welding, by Neale E. Orrok *(d)* 2-150

Magnesium alloys
Aerospace Castings Produced From Magnesium-Lithium-Silicon Alloy, by Anthony Saia, Ralph E. Edelman and Herman L. Gilmore.....2-117
Producing High Quality Resistance Welds in Aluminum and Magnesium, by Lyle Wallis 4-72

Materials selection
Selecting Materials for Small Appliances . . . How Sunbeam Does It, by Richard W. Hanzel 5-58

Metallography
Metallography . . . Ally of the Engineer.... 1-90
Metallography Answers Questions on Joint Quality 5-102
Mounting and Grinding Taper Section Specimens, by William A. Roman and Robert R. Russell *(sr)*.....6-105

Metalworking
Extending the Possible in Metalworking, by Ralph G. Dermott..... 4-60

Molybdenum
Diffusion Bonding Beryllium. Molybdenum and Tungsten, by Anthony T. D'Annessa 2-71

Nickel alloys
Electroflux Remelting Improves Properties of Inconel 718, by Leonard G. Joseph and G. Robert Mumau.....6-139
Furnace Brazing Inconel 718 for Nuclear Reactors, by Leopoldo Marti-Balaguer and Marshall E. Rinker.....5-113
Where You Can Use Today's Superalloys, by Ward F. Simmons and Herbert J. Wagner..... 6-87

Nondestructive testing
Applying NDT to Welds, by Neale E. Orrok 2-177
NDT Assures Vacuum Tightness in Cryogenic Tanks, by Robert J. Roehrs.. 4-85

Nonmetallic composites
Where Nonmetallic Composites Are Used, by George Epstein, V. Frank Hribar and Harold Smallen.....3-105

Nuclear reactors
Materials for Boilers and Nuclear Reactor Vessels, by Roy E. Lorentz Jr. and Walter L. Harding *(ds)* 4-94A
Selection of Materials for Boilers and Nuclear Reactors, by Roy E. Lorentz Jr. and Walter L. Harding..... 4-95

Paint
Electrodeposited Paint Protects Sharp Edges, by Joseph E. Foster..... 2-87

Phosphate coatings
A Phosphate Coating That Can Be Welded, by Joseph E. Foster *(d)*.....6-160
Phosphating System Rustproofs Truck Bodies, by Joseph E. Foster..... 3-89

Plastics, ABS
New High Impact ABS Is Strong, Easily Molded *(tn)* 1-7

Plastics, reinforced
Molded Aircraft Wheels of Reinforced Plastics, by Norman L. Gamble.....4-115
Plastics in the Boeing 737, by John P. Billington 2-96
Where Nonmetallic Composites Are Used, by George Epstein, V. Frank Hribar and Harold Smallen.....3-105

Polymer powders
A New Look at Coating Metal Parts With Polymer Powders, by Lester L. Spiller 1-146

Porcelain enameling
Sheet Steels for Porcelain Enameling, by Neale E. Orrok *(d)*.....3-154

Powder metallurgy
Extending the Possible in Metalworking, by Ralph G. Dermott..... 4-63
Sintered Type 316L Stainless . . . Its Properties and Processing, by Athan Stosuy and Ross R. Holmes..... 5-81
A Steel Powder for High Density Parts, by Robert A. Huseby..... 5-77

Precipitation hardening alloys
Optimizing Heat Treatments for Precipitation Hardening Superalloys, by Richard R. MacFarlane and C. Raymond Whitney..... 2-75

Presses, forging
Extending the Possible in Metalworking, by Ralph G. Dermott..... 4-62
Lockheed: 'Cost Savings Could Pay for the 200,000 Ton Forging Press' *(tn)*..... 2-7

Pressure casting
Pressure Casting Step by Step.....2-137

Pressure vessels
LM — Next Step in the Conquest of Space, by Neale E. Orrok..... 2-58
Materials for Boilers and Nuclear Reactor Vessels, by Roy E. Lorentz Jr. and Walter L. Harding *(ds)* 4-94A
Selection of Materials for Boilers and Nuclear Reactors, by Roy E. Lorentz Jr. and Walter L. Harding..... 4-95

Quenching
Quenching Steel Plate on the Fly, by G. F. Melloy, C. W. Roe and R. D. Romeril 3-131

Refractory metals
Refractory Metals Brazed for Operation at 2200 F, by Renato M. Baciarelli.....4-189

Resistance welding
Producing High Quality Resistance Welds in Aluminum and Magnesium, by Lyle Wallis 4-72
Resistance Welding Today, by Neale E. Orrok 4-67
Stranded Copper Wires Joined by Resistance Welding *(tn)* 2-7
Two Ways to Join Wire Spacers to Reactor Fuel Tubes, by Stuart R. Vandenberg 6-67

Rotors
A Decade of Improvements in Generator Rotor Forgings, by Herman D. Greenberg 3-93

Sheets
Reducing Defects in Steel Sheets, Staff Report 4-137
Sheet Steels for Porcelain Enameling, by Neale E. Orrok *(d)*.....3-154
Using Inserts in Sheet Forming Dies, by Paul G. Nelson..... 1-83

Shot peening
A Test for Blast Cleaning and Peening Media, by David A. Hale..... 4-78

***(cp)* Critical Point; *(d)* Digest; *(ds)* Data Sheet; *(sr)* Short Runs; *(tn)* Technical News**

Silicon carbides
Where Nonmetallic Composites Are Used, by George Epstein, V. Frank Hribar and Harold Smallen 3-105

Spacecraft
LM — Next Step in the Conquest of Space, by Neale E. Orrok 2-58
Making Satellite Structures from Beryllium-Lockalloy, by John A. Van Hamersveld, Thomas S. Svendsen and Walter C. Hayes 2-91
Materials . . . Design . . . Fabrication . . . Testing . . . An Analysis of Failures in Spacecraft, by Alfred J. Babecki, John D. Grimsley and Henry E. Frankel 2-100
Materials in an Atlas-Agena Shroud, by Merritt E. Langston 2-125
Spacecraft Plumbing Systems, by Lawrence J. Korb, Lewis W. Myers and Joseph Soja 2-65

Specifications
Specifications . . . Their Preparation and Use
Develop Them Carefully, by Walter L. Fleischmann 4-101
Enforce Them Wisely, by Walter L. Fleischmann 6-100
Write Them Accurately, by Walter L. Fleischmann 5-86

Stainless steels
More Resistance to Stress Corrosion Is Promise of New Austenitic Stainless *(tn)* 4-9
Sintered Type 316L Stainless . . . Its Properties and Processing, by Athan Stosuy and Ross R. Holmes 5-81
Stainless Steel Wire Features Great Strength at High Temperatures, by Vijay K. Chandhok and August Kasak 1-108
Stainless Wire + Aluminum Matrix = Strong, Light Composite Plate, by LeRoy W. Davis 4-105

Steelmaking
Reducing Defects in Steel Sheets, Staff Report 4-137

Steels
Chromized Steel . . . Corrosion Resistance at Less Cost Than Stainless Steel, by Richard M. Willison and Julius v. D. Forstmann 1-99
Chromized Steel . . . Welds Are Strong and Corrosion Resistant, by George F. Melloy and Enos N. Brubaker 1-104
For High Fatigue Strength, Select a Strong Steel, by Frank E. Havens and James P. Bruner 6-123
Quenching Steel Plate on the Fly, by G. F. Melloy, C. W. Roe and R. D. Romeril 3-131
Reducing Defects in Steel Sheets, Staff Report 4-137
Relieving Hydrogen Embrittlement in Fully Hardened Electroplated Steel, by George E. Wood and William L. Mitchell 3-79
Sheet Steels for Porcelain Enameling, by Neale E. Orrok 3-154
A Steel Powder for High Density Parts, by Robert A. Huseby 5-77
Tractor Gears . . . Steel and Heat Treatment Selection, by Neale E. Orrok *(d)* 1-126
What Engineers Should Know in Designing Welded Structures, by Simon A. Greenberg 6-93

Tanks
NDT Assures Vacuum Tightness in Cryogenic Tanks, by Robert J. Roehrs 4-85

Technology Forecast
Technology Forecast '67 1-11

Testing
What You Should Know About Testing Electroplated Coatings, by Albert C. Benning 4-125

Titanium alloys
Extending the Possible in Metalworking, by Ralph G. Dermott 4-63
Heat Treating Titanium and Its Alloys, by John A. Burger and Dean K. Hanink 6-70
Titanium in Process Equipment, by Fred H. Vorhis 2-105

Tool steels
Use of Tool Steel Flats Lowers Die Making Costs *(tn)* 1-7

Tractors
Tractor Gears . . . Steel and Heat Treatment Selection, by Neale E. Orrok *(d)* 1-126

Trucks
Phosphating System Rustproofs Truck Bodies, by Joseph E. Foster 3-89

Tubing
Extending the Possible in Metalworking, by Ralph G. Dermott 4-63
A Modern Mill for Copper Tubing, Staff Report 1-113
Spacecraft Plumbing Systems, by Lawrence J. Korb, Lewis W. Myers and Joseph Soja 2-65

Tungsten
Diffusion Bonding Beryllium, Molybdenum and Tungsten, by Anthony T. D'Annessa 2-71

Turbines
Problems With Turbine and Generator Materials, by David L. Newhouse 3-98

Waste disposal
Neutralizing Liquid Wastes in Metal Finishing, by Leslie E. Lancy 4-82

Wear
Fight Against Wear Starts With Material Selection, Staff Report 5-69

Welding
Chromized Steel . . . Welds Are Strong and Corrosion Resistant, by George F. Melloy and Enos H. Brubaker 1-104
Guidelines for Selecting Gas Metal Arc Welding Methods, by Neale E. Orrok 6-57
The Laser in Machining and Welding, by Neale E. Orrok *(d)* 2-150
Two Ways to Join Wire Spacers to Reactor Fuel Tubes, by Stuart R. Vandenberg 6-67
What Engineers Should Know in Designing Welded Structures, by Simon A. Greenberg 6-93

Welds
Applying NDT to Welds, by Neale E. Orrok 2-177
Metallography Answers Questions on Joint Quality 5-102

Westec
1967 Westec Technical Program 2-9
Quality Fabrication Practices Highlighted at Westec *(tn)* 4-7

Whiskers
Where Nonmetallic Composites Are Used, by George Epstein, V. Frank Hribar and Harold Smallen 3-105

Wire
Beryllium Wire: A New Engineering Material, by Norman P. Pinto and John P. Denny 6-107
Stainless Steel Wire Features Great Strength at High Temperatures, by Vijay K. Chandhok and August Kasak 1-108
Stainless Wire + Aluminum Matrix = Strong, Light Composite Plate, by LeRoy W. Davis 4-105

Zinc
New Coatings for Zinc, by Albert R. Cook 3-111

Zinc die castings
Preparation Can Lower Cost of Plating Zinc Die Castings, by William H. Safranek 5-95
